DETAILED ACTION

Election/Restrictions

1. This application also contains claims directed to the following patentably distinct species of the claimed invention:

The species are as follows:

<u>Species</u> (distal end of forceps)	<u>Figures</u>	<u>Claims</u>
1	3A-4D	6 and 7
2	15A-16D	13

Generic claims are at least claims 1 and 10.

2. Claims 6 and 7, which is read on Figures 3A-4D, requires forceps supporting pins 22a and 22b having the distal end that mechanically spread to form pin flat portion 2221a and 2221b (see specification, page 19, lines15-25). Claim 13, which is read on Figures 15A-16D, requires forceps supporting pins 22a and 22b wherein each having a tubular pin 115a and 115b that fit onto supporting pins 22a and 22b, respectively (see specification, page 56). Therefore, the inventions are distinct and required a divergent fields of search.
3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.
5. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.
6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
7. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at

least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. **Due to the complexity of this requirement, no solicitation of an oral election was made. This requirement is being sent out by mail only.**
